ihs
In loving memory of
Thomas Vate Benyon
Late Captain 4th Hussars
who departed this life
June 28th 1893
Aged 53 years.
This tablet was erected
in affectionate remembrance
by his nephews.
Passing away, saith my Soul, passing away.
With its burden of fear and hope, of labour and play
Hearken what the past doth witness and say:
Rust in thy gold, a moth is in thine array.
A canker is in thy bud, thy leaf must decay.
At midnight, at cockcrow, at morning, one certain day
Lo the Bridegroom shall come and shall not delay
Watch thou and Pray.
Then I answered: Yea.

KAPOK LIFE SAVING BEDDING.

This material will support more than 30 times its own weight in sea water. A small pillow in waterproof covering will save a person from drowning; **a mattress becomes a raft.** Best Kapok alone will produce this result (no other is used); it is the lightest, purest and softest filling that can be employed, and it is moth-proof. A lady can carry a mattress in one hand from the cabin to the deck: sleep, therefore, is aided by a feeling of security when at sea.

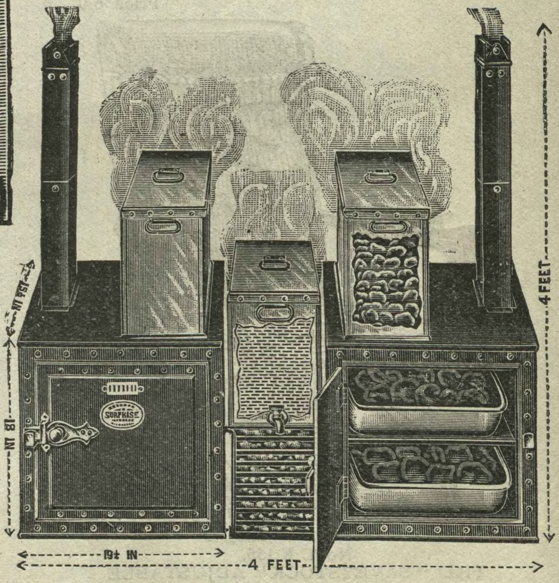
"SURPRISE" COOKING STOVE.



No. C F 160.

This unique Stove has several obvious advantages over all other portable field stoves. The heating chambers entirely surround the ovens, so that a uniform heat is ensured, and the contents cooked in an even temperature, thus avoiding all risk of under-cooking or burning. The Stove is very simple in its management. It will cook for about eighty men, the cost of fuel not exceeding twopence, and will operate equally well with either a wood or a coal fire, and so combines the maximum of accommodation with the minimum of cost. The Flues can be readily cleaned by removing the small plates at top and bottom. Weight of Stove, 1¾ cwts., comprises 2 ovens, size 19½×16×18 in. outside measurements, 4 Baking Dishes, 3 Tin Boilers (one fitted with tap), the whole packing into 2 ovens. Price with crate complete, £9 0 0

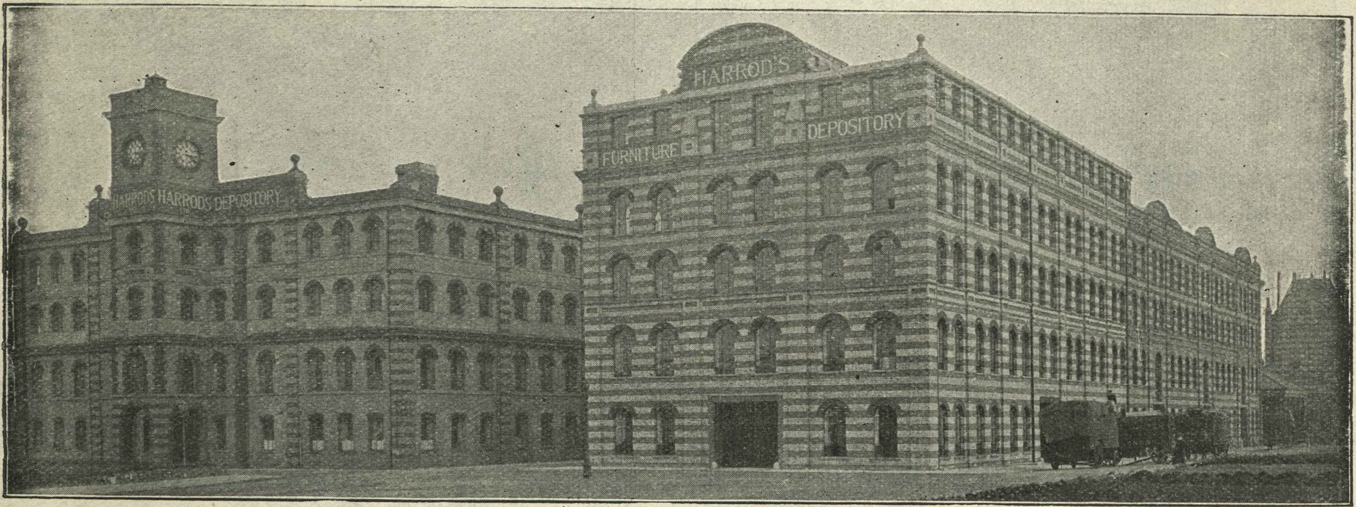
REMOVALS & WAREHOUSING DEPARTMENT

A PUBLIC TELEPHONE IS PROVIDED IN THIS DEPARTMENT FOR CUSTOMERS' USE.



HARRODS' DEPOSITORIES AT BARNES.

ONE OF THE SAFEST AND MOST UP-TO-DATE STORAGE PLACES IN THE WORLD.

These spacious Depositories, which are completely isolated, stand in Harrods' own grounds of 10 acres. They are constructed on fire-resisting principles—are thoroughly dry and well ventilated, thus ensuring the utmost cleanliness and safety for goods in storage. Huge hydraulic lifts take the loaded removal vans direct to the various floors for storage, which saves all straining and risk of damage to goods. Intending depositors are invited to apply for a card to visit this interesting establishment.

REMOVALS BY LAND OR SEA TO AND FROM ALL PARTS OF THE WORLD—ESTIMATES FREE

Inclusive estimates are submitted free of cost at any distance within forty miles. Estimators can be sent to any part of the Country on payment of their third-class return fares, or abroad on payment of reasonable expenses, chargeable only in the event of no business resulting. In cases where it is impracticable or inadvisable to remove furniture abroad in our well-known Railway Vans, estimates will be submitted for the packing and forwarding of it, in cases, to any part of the world.

REMOVALS ABROAD. UNIQUE FACILITIES.

REMOVAL BY VAN

Our Continental Vans, built especially for this traffic, are constantly in transit and are frequently available on their return journey for our Clients, thus saving the carriage expense on the empty van one way. Favourable quotations can also be had **per van load** for shipment to **any part of America.**

FURNITURE PACKED IN CASES

The goods are packed at our well-known Barnes Depository, and are shipped direct from Wharf attached, by our own Lighters, which ply between this Wharf and all the London Docks. This is a very great advantage to Clients, as the cases are delivered free on board at a much lower rate than by road, and all the heavy Dock charges attached to the ordinary system are completely avoided.

THIS CONSTITUTES A SAVING OF SEVERAL POUNDS, EVEN ON A SMALL CONSIGNMENT OF FURNITURE

FROM SHIP TO DEPOSITORY.

Harrods' Barges also take delivery from ships on their arrival at London, avoiding all Dock charges here also.

A POWERFUL SPECIALLY-CONSTRUCTED CRANE

has been erected at Barnes for transferring goods from Lighters to our Wharf, and *vice versa.*

We believe that no other firm in London can offer such advantages to those removing to or from Abroad.

Removal from Kensington to Store.

January 8th, 1912.

I wish to inform you that your men removed the furniture from my flat in a most workmanlike fashion. The tenants above and below me said they would not have known that moving was being done, had they not seen the cases. The Head Porter told me it was the tidiest and best managed move he had ever seen. A tenant of another flat told me she had been much struck with the excellent neatness *re* packing cases and general work she saw done from her windows (Flat 2.) I think you may hear from her later on. For myself, I cannot speak too highly of your excellent methods. You moved for us and stored our goods for one year some years ago, and when our furniture came back to us there was absolutely no fault to find, nothing but praise for excellent care shown. The thing that gave us most pleasure was the total absence of damp in every instance.

Yours very truly, (Mrs.) M. BREMNER.

Pianoforte & Musical Instrument Department.

A PUBLIC TELEPHONE IS PROVIDED IN THIS DEPARTMENT FOR CUSTOMERS' USE.

The prospective purchaser will find this list a reliable guide of the best English and Continental Pianos. It contains only a small representation of Harrods' enormous stocks, but every care has been taken to make it as representative as possible within the space limit. The majority of the instruments illustrated are always in stock at Harrods', where purchasers have the advantage of testing the touch and tone of various makes side by side in the most spacious and elegant showrooms in the Kingdom.

Should it be desired, however, to purchase a Piano direct from the manufacturers, Harrods will be pleased to send an expert by appointment to accompany clients and offer advice in the selection of the instrument.

Any Piano selected from Harrods' stock which is not approved may be exchanged free of charge within three months of the date of purchase for any other make of equal value, provided, of course, it has not been damaged in any way.

Harrods' Equitable System of Deferred Payments

(With Surrender Value)

OFFERS SPECIAL FACILITIES FOR ACQUIRING PIANOS BY QUARTERLY INSTALMENTS, EXTENDING OVER A PERIOD OF ONE, TWO, OR THREE YEARS.

All Pianos in stock are marked at nett cash prices, and when purchased on above system, in most cases only 10 per cent. is added to the prices for the full three years.

(There are exceptions and variations in the case of certain makers, but generally speaking the above rule holds.)

The same terms apply where Harrods allow special discounts off Manufacturers' List Prices, the full discounts, ranging from 20 per cent. upwards, are given and only 10 per cent. added for three years' purchase.

In addition, should any purchaser of a Piano desire through unforeseen circumstances to discontinue payments, Harrods are quite willing to take the instrument back and treat the matter on the Monthly Hire Scale, and return any balance, provided of course that the instrument has been properly taken care of, kept in a dry, even temperature, and been regularly tuned by Harrods.

In the event of any purchase being completed in a shorter period than that originally arranged a special allowance is made from the full price.

RETURNED HIRE PIANOS AT REDUCED PRICES.

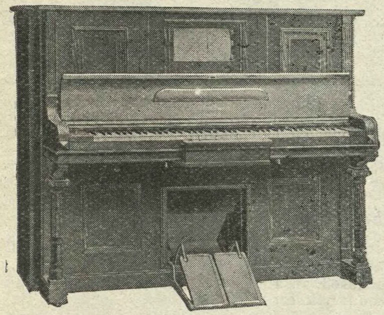
In consequence of the extensive hiring business done by Harrods, it is possible to offer at most times a wonderful range of instruments which have had, as a rule, only slight use.

These comprise models by the most famous makers, and having been on hire only to the best houses are for all practical purposes as useful as new instruments.

Harrods cordially invite correspondence from clients unable to visit the stores, and if customers will kindly indicate their wishes regarding style and price, suggestions and advice will be gladly submitted.

Hints on the Proper Care of a Piano.

In order to assist those who are anxious to preserve the quality, tone, touch, and appearance of their Pianofortes, and obtain the utmost pleasure from them, HARRODS respectfully submit the following suggestions:—



LIPP MINIGRAND

Damp is the greatest enemy of a Piano. The instrument should never be kept in a lower temperature than 60 degrees Fahr. Extreme heat is also injurious. Pianos should not be placed in a direct draught—against the outside wall—adjacent to a window or conservatory, or very near a fire, unless well protected. Should any noise or jarring sound be heard when a Piano is played, it is advisable to ascertain the cause before condemning the instrument. Often it is found to arise from a loose key or candle bracket, or possibly some hard substance dropped inside, or by some adjacent ornaments which sound in sympathy with certain chords and notes. Pianos should be dusted with a soft cloth, and finished with a dry chamois leather to keep the polish bright. Any dulness of polish due to natural oils working through the wood can easily be removed, if attended to at once.

It is important that all Pianos should be regularly tuned and attended to, whether in constant use or not, by competent tuners.

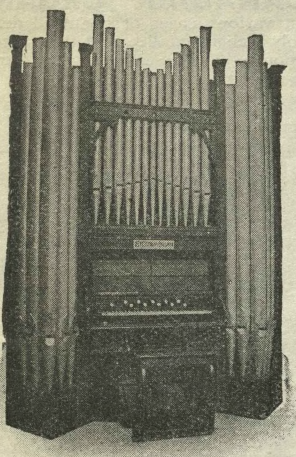
PIPE ORGANS: Estimates and Specifications submitted for Pipe Organs for all purposes, Expert advice given.



"ST. CECILIA" PIPE ORGANS.

The Tone is produced, exclusively, from full-scale ORGAN PIPES of the finest quality which are the same as used in the largest Two and Three-Manual Church Organs. The ST. CECILIA ORGAN is built in several models, but the smallest pattern is far superior to the largest and most costly "American" Reed Organ or Harmonium. It possesses much more variety of tone and also greater carrying power; for blending with and supporting the voice it is unequalled.

The ingenious Pneumatic Action introduced enables the "double bass" stop to give a Pedal Organ effect, actuating from the Manual. On this stop only the lowest note held in a Bass chord is sounded, thus it removes the difficulty of using the Pedals, while preserving the effect, and a perfect 16-feet Pedal Bass is obtained. For those that prefer a Pedal Board, special Models are manufactured.

Cash Prices, from **£50.**

Specifications furnished on application.

"ST. CECILIA" ORGANS WITH ORGANOLA.

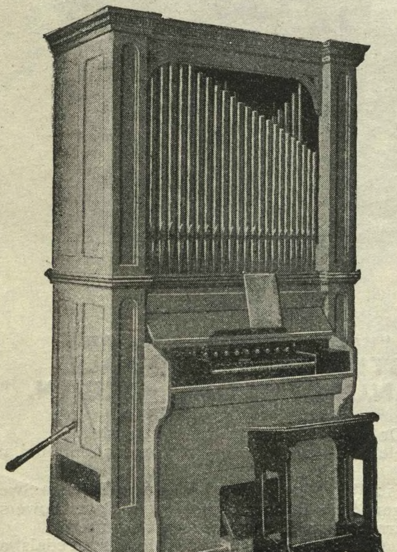
The "ORGANOLA" is a substitute for the most skilled fingers, and will enable anyone old or young to play the Organ with the expression and technique of an accomplished musician, even though never having played an organ before.

Extra cost fitted into St. Cecilia Organs £38 10 0

THE "POSITIVE" PIPE ORGAN.

FOR CHURCH, HOME AND SCHOOL.

The "POSITIVE" ORGAN—an entirely British invention and production—was originally designed as a real Organ to replace the Reed Instruments hitherto commonly in use in Village Churches, Mission Rooms, etc. Real Organ Pipes alone are used to produce the tone. A skilled organist is not required, since, from its single keyboard, anyone who can play a Harmonium correctly can obtain perfectly the absolute effect of a Two-Manual and Pedal Organ, and can also transpose.



The precise effect of skilful pedalling is obtained by A PATENT PEDAL-BASS STOP, which plays in the 16 ft. tone the LOWEST NOTE ONLY of any chord or succession of chords. The effect of a second manual is obtained by PATENT MELODIC SOLO STOPS, whereby the melody of a hymn or voluntary is made to stand out above the accompaniment. To obtain these effects NO SPECIAL SKILL IS NECESSARY. The TRANSPOSER enables the pitch of a tune to be changed to bring the music within the reach of the singer or congregation.

The "Positive" Organ can easily be blown by the feet or by a hand-blower. The "Positive" Organ occupies no more floor-space than a Harmonium.

LAMP DEPARTMENT.

GREEN'S ARCTIC LAMPS FOR CANDLES.

IMPROVED PATENT.

In the new Arctic Lamps the shade support is stronger, having three arms instead of two; the extinguisher is not so upright and will not fall down if the lamp is moved. The fitting for candlesticks is simpler and obviates any difficulty in removing the plug from the candlestick nozzle.

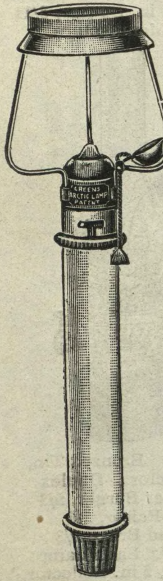
A tapering adjustable rubber end is now made which will fit in any size nozzle; it does not scratch silver, and is especially suitable for china or glass candelabra.

The Arctic Lamp is constructed on the same principle as a carriage or reading lamp, in which the candle, enclosed in metal tube, is forced up as it burns by means of a spiral spring inside.

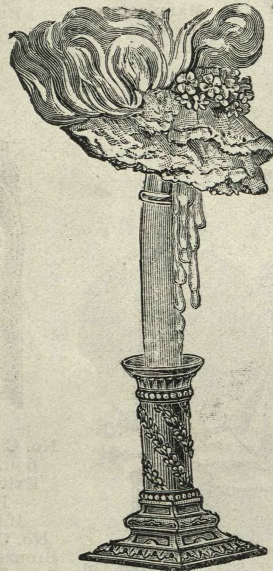
It fits in any candlestick, and is made to exactly resemble a wax candle when in use.

For the dinner table decoration it is particularly useful, as the candles remain the same height, yet are burnt to the very end without the slightest waste.

No more guttering candles; no more candle shades taking fire; no smoke or smell when extinguished.



The "Arctic" Lamp, with Adjustable Rubber End.



Result of using ordinary Candle-shade Support.

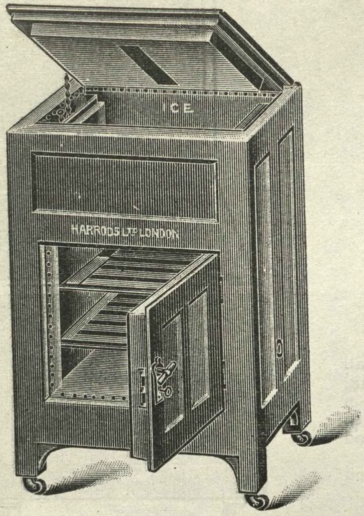
REFRIGERATORS—*continued.*



By the scientific construction of the "Harrod" Cabinet Refrigerators, the consumption of ice is reduced to a minimum. These Cabinets are unique in many ways, one distinct advantage being the completely separate chamber for the ice, which is not exposed to the outside or warm air when putting in or taking out edibles; this obviates unnecessary waste, and renders these cabinets both economical and efficient. They further commend themselves to intending purchasers by their convincingly moderate price.

THE "HARROD" IMPROVED CABINET REFRIGERATOR.

Our new Dry Air Cabinet Refrigerator, constructed especially for us and to our own specification, having great improvements this season to reduce the consumption of ice. The peculiar and scientific construction of this Refrigerator creates a thorough and constant circulation, by which all vapours arising from foods in the provision chamber are condensed in the ice-pan and run off with the melting ice. THE RATNER PATENT TWELVE-CORNER-BENT SOLID STEEL SAFES. Nos. 2 & 3.

Safes are delivered free of charge in London to customer's house, but should same be required to be hoisted or taken upstairs to flats, &c., an extra charge will be made accordingly.

FIRE AND FALL RESISTING.

These Safes are far superior to the ordinary Four-Corner-Bent Safes.

The body is bent out of one solid steel plate ¼ in. thick; Door ½ in. solid steel plate, strengthened to 1 in., drill-proof over Lock, and secured by a Seven-Lever, Unpickable, Gunpowder and Drill-proof Lock.

The bodies are formed of one plate of steel bent at the twelve corners, thus introducing the important feature of a body which in no way depends upon screws or rivets. This improved construction enables a Safe to withstand a much greater fall than a Safe made in the usual way.

The Fire-Resisting Chambers are 3½ inches thick throughout.

Body made of tough steel ½ in. thick, bent at twelve corners, the back being securely riveted on the inner face of the back flange.

Doors ½ in. steel plate, strengthened to 1 in. over Lock and other vital parts.

Lock Case of steel, T section 3 × 2½ × ⅜ in., fitted with numerous steel bolts in front and a continuous fixed bolt at back of door. The door rabbets against a strong bar frame, entirely preventing its being forced open by means of wedges. This frame extends round the whole inside face of the front flange to which it is securely riveted.

Bolt-work secured by Ratner Improved Balance Seven-Lever Unpickable Powder and Violence Proof Locks, protected by a Plate of Ratner Drill-proof Compo. Safe Steel ½ in. thick.

TOOL CABINET.

THE "COMPACTUM" TOOL CABINET.

This Cabinet is framed in dark American Walnut Wood, with Ash Panels, and has a work bench made of very strong well-seasoned hard wood, which is fitted with a patent Bench-stop, and also with an improved iron Instantaneous Quick Grip Bench Vice. The fittings are made of polished brass, and the Cabinet throughout is of superior strength and workmanship. When closed it makes a handsome and well-finished piece of furniture.

It is 3 ft. 6 ins. long × 2 ft. 6 ins. high; the top forms the Carpenter's Bench, which is 3 ft. 6 ins. long × 1 ft. 6 ins. wide. An extension piece is sent out with each Cabinet; this can easily be attached and firmly fixed to one end, thus making the Bench 5 ft. long. In this respect it is a great improvement on any combined Cabinet and Work Bench yet placed on the market. It can also be fixed in front of the Bench for Wood Carving or for any other work that requires a strong table.

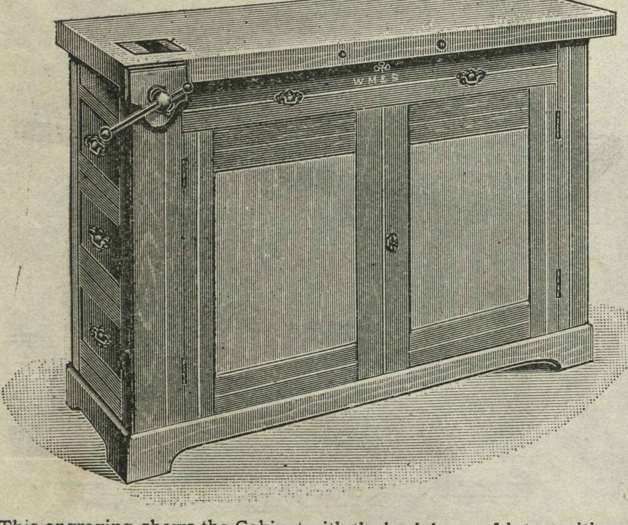
The above engraving shows the Cabinet with the extension attached to it forming a full-size bench 5 ft. long. This engraving also shows the Cabinet open, and it will be seen that the lower part is fitted with racks or clips, in which to place the tools, and that the same use is made of the inside of the two doors. There is also a back to the Cabinet, which can be raised by an ingenious contrivance with the greatest ease, and this is also used as a rack for tools, so that "*each tool has its special position.*" The value of this arrangement will be at once recognised by all methodical workmen. Every tool will be in its proper place, and can be found when required. On the right side of the Cabinet there is a cupboard to hold the extension piece, and which can also be used to stow away large planes or any other large tools that may be acquired. On the left side are three drawers, as shown in the following engraving, which will be found very useful for any additional tools, or for small work of any description, and in front, under the bench, there is a long shallow drawer, with partitions for nails, screws, brass fittings, etc.



This engraving shows the Cabinet with the back lowered into position, and the doors closed ready for use as a Joiner's Bench, and fitted with 2 in. Quick Grip Vice.
